

# Do you have an AI Policy Yet?

You know you need an AI Policy for your business, but you're not sure where to start?

Here are 10 questions you should be asking to formulate your AI Policy.

1. What are the primary goals for using AI in our organisation?
2. How will AI integrate with our existing processes and workflows?
3. What data types will AI use, and how will we ensure its accuracy and compliance with privacy regulations?
4. Who will have access to AI tools, and what training is required to ensure responsible use?
5. How do we address ethical concerns like transparency and fairness in AI decision-making?
6. What measures will we take to prevent and detect AI-related biases?
7. How will we handle accountability for AI outcomes, especially in cases of errors or unintended consequences?
8. What security protocols do we need to implement to protect AI systems and the data they use?
9. What guidelines should we establish for employees using generative AI tools, such as those for content creation or coding assistance?
10. How will we monitor and evaluate AI's ongoing performance and impact on business operations?

Are you still struggling? We're here to help. We'll write you an AI Policy in no time. Contact us at [aigile.dev](https://aigile.dev).
